

2007 MRMIP Disenrollment Survey

For the month of January 2007, a total of 602 subscribers were disenrolled from the MRMIP Program. Of the 602 disenrollments, 178 (29.57%) subscribers were disenrolled as a result of becoming MRMIP Graduates. The MRMIP conducted a survey of 424 (70.43%) subscribers who were disenrolled for other reasons besides graduating from the MRMIP. Of the 424 subscribers that were surveyed, 71 (16.75%) subscribers responded to the survey and identified various disenrollment reasons. There was an increase in the total number of subscribers surveyed compared to last year. In 2006, 355 (46.10%) subscribers were surveyed. However, the number of individuals responding to the 2007 Disenrollment Survey decreased from the previous two years.

Of the 71 subscribers who responded, 37 (52.11%) subscribers indicated that they obtained other health coverage outside of MRMIP. 21 (29.58%) of the subscribers who responded specified that they could no longer afford MRMIP premiums, compared to 30 (30.61%) the year before. Others responded to the survey, identifying different disenrollment reasons, which are noted in the table below.

When comparing the reasons why subscribers were disenrolled from the MRMIP in the last 3 years, the highest reason for disenrollment continues to be because the subscribers obtained other health coverage. The second highest reason is because the subscribers could not afford the MRMIP monthly premiums.

Disenrollment Reason	2007	
Now on Spouse's/Parent's Health Insurance Policy*	4	5.63%
Receiving Health Benefits From Medicare*	7	9.86%
